

# Adam Preece

JavaScript Developer

Diligent Javascript developer that focuses on front-end frameworks such as React. I have a passion for designing website and applications across multiple APIs that have excellent responsiveness and web accessibility. To grow my skills I am focusing on building applications using the MERN stack and also implementing serverless technology.

I have had successful careers in Polymer/Chemical Engineering and as a Mathematics teacher where I was a collaborative team player with excellent communication and problem solving skills whilst working in a fast paced environment. Proven ability to take initiative and think logically. Interested in a position where continuous learning and development is both valued and encouraged.

## Projects

2022-02 - present	<b>Project Creator</b> <i>Phonebook Application</i>  This project developed my MERN full stack applications skills, where I learned how to successfully connect the front-end to the back end. This also involved deploying a working version of the app at Heroku and how to write scripts to quickly update Git and Heroku deployment.
2021-11 - 2021-12	<b>Project Creator</b> <i>Forkify application</i>  This application was fully programmed using vanilla javascript and fully utilising an API. Learned a design structure (MVC) and how to refactor code to adapt to this design pattern.
2022-02 - present	<b>Project creator</b> <i>Country and Weather Information</i>  This project uses multiple API and the React framework. Learned how to quickly pick up multiple technologies (such as React, netlify and Git) to produce a working version of the application
2021-11 - 2022-01	<b>Project Creator</b> <i>Responsive Portfolio and Restaurant Design</i>  Learned how to fully design a fully responsive website by focusing on a mobile-ready site using CSS and HTML core principles. Learned how to focus on small details by cloning a FIGMA based restaurant design.

REACT Framework

MERN Full Stack

Critical Thinking

Responsive design

SEO techniques

## Transferable Skills

### Skills

#### Time management skills

Strong time management skills required while working as a teacher to ensure that learning time was optimised and different elements of the job prioritised effectively.

#### Problem solving skills

Required to evaluate situations and develop solutions quickly to promote the best pupil outcomes.

#### Communication skills

Strong communication skills required to lisase effectively with a wide range of stakeholders including pupils, parents and other staff.

#### Collaboration

High levels of collaboration with other members of staff required to raise standards, give feedback and build trust.

#### Creativity

Creative and innovative teaching methods and practices required constant refining and tailoring to different groups of pupils.

#### Adaptability

Worked in fast paced environment where I rapidly had to learn and pick up new skills by immersing myself into the culture. Proven ability to be able to succesfully multitask.

## Work History

2017-09  
- 2021-09

**Teacher of Mathematics**

*Dixons Unity Academy, Leeds*

Worked in a fast paced challenging environement where I had to rapidly learn to thrive in a new culture. Developed excellent mulit-tasking and communication skills. Learned how to communicate very effectively with different aspects of the school environment ranging from students to a corporate level.

Had to adapt my skillset in the pandemic and learn how to pick up new and very different technologies but took a very disciplined approach which benefited my performance. Created strategies and took leadership over solutions which enhanced the teams and students.

2012-09  
- 2016-08

**Teacher of Mathematics**

*Leeds West Academy, Leeds*

## Education

2000-09  
- 2005-08

**Chemical Engineering, MEng**

*University of Bradford, Bradford*

2006-09  
- 2010-07

**Polymer Engineering, Postgraduate Research**

*University of Bradford, Bradford*

2010-09  
- 2011-08

**Education, PGCE**

*University of Huddersfield, Huddersfield*
